

SJ1 Separates COS & PL logic signals, and allows use of DB25 - 1 or "E" as active low PL logic output.

SJ2 Combines COS and PL as "AND" (use either COS logic output as ANDed COS and PL logic).

SJ2 Low logic on DB25 - 1 or "E" Remote PL disable input.

DB25-7, 12 & 25 -- Spares DB25-18 through 24 -- Ground
